CRIBPOINT

An innovative and reliable **terminal** that controls the ordering, distribution and return processes for products, particularly large volumes, from a central warehouse.

CRIBPOINT is a modern and **self-service terminal** improving warehouse processes of **ordering, distribution, and product returns**. CRIBPOINT comes equipped with the proprietary application – **Virtual Warehouse**, which forms a core component of the IRSYSTEM software suite. Characterized by its modular design, CRIBPOINT can be conveniently installed in various locations. It boasts a large, clear **21-inch touchscreen** complemented by a user-friendly interface, making it easy to navigate. The terminal's advanced **product loading technique** facilitates quicker and more efficient warehouse management. Key features of CRIBPOINT include a built-in **RFID reader**, **barcode scanner**, and **QR code scanner**. Additionally, it can be outfitted with a **printer** for issuing receipts for warehouse transactions.

TECHNICAL SPECIFICATIONS

Height [mm]	1450
Width [mm]	360
Depth [mm]	360
Voltage [V]	230 VAC – 50 Hz
Power usage [W]	5/80
Weight [kg]	80

VIRTUAL WAREHOUSE ADVANTAGES

- **Round-the-clock** operation for issuing and returning items.
- **Up to 50% reduction** in inventory consumption.
- Capacity to store up to **50,000 item indexes**.
- **Quick** product loading.
- **A 21-inch touchscreen** with a modern, intuitive interface.
- Integrated **RFID reader**, **barcode scanner**, and **QR code scanner**.
- **Real-time inventory monitoring** via the IRSYSTEM web application.
- **Modular design** allowing for the combination of multiple units.

IRSYSTEM APPLICATION

For each machine we offer proprietary **IRSYSTEM software** tailored to individual customer needs, which opens up **unlimited possibilities for remote process management**. IRSYSTEM enables **data migration** and fast communication between the server and machine.

- possibility of **integration** with systems such as ERP, GERP, SAP, etc.
- automatic **generation of reports** and orders
- real-time **preview of available stock levels** inside the machine
- management of employee **access authorisation** to the machine
